TOWARD RAISING HEALTHY, HAPPY KIDS

At Dedham Medical, we feel privileged to be able to help you care for your children. Our goal is to provide you with important ongoing preventive medicine services as well as with care and treatment when your kids do get sick.

In fact, we emphasize the preventive measures that help to minimize illness. That's why our patients have one of the highest rates of well-child visits of any pediatric practice in Massachusetts, and one of the highest immunization rates.

When inevitable illnesses do occur, our skilled clinicians are ready to provide your children with top-quality care, whether for something as common as an earache or sore throat, or for more serious problems.

Members of our medical staff are regularly recognized for their excellence with awards such as the "Outstanding Community Pediatrician Award" from Children's Hospital, the "Excellence in Primary Care Award" from Blue Cross and Blue Shield and the "Physician of the Year Award" from Harvard Pilgrim Health Care.

At Dedham Medical, helping you raise healthy, happy children is our number one goal. We focus on issues as varied as newborn care and adolescent medicine – from a doctor's visit for a fever to a nurse practitioner's helping a new mother learn the fine points of breast feeding. Most important in starting a child off right is a series of well-baby visits that begin soon after birth and continue regularly through the first two years before becoming annual, with immunizations as appropriate.

Happily, with today's emphasis on well-child care and immunizations, babies and children tend to be quite healthy. This gives us more time as pediatric caregivers to focus on helping parents understand their children's physical and emotional development as they grow.

TO MAKE AN APPOINTMENT

You can make an appointment with any of our 14 physicians by calling the main number at 781-329-1400 and asking for Pediatrics. Our assistants will be happy to set you up with an appropriate clinician, even for an informational visit.

We offer pediatric care at both our Dedham and Norwood offices and we have x-ray and laboratory resources on hand in both locations.

We normally see patients during regular office hours, from 8:30 am to 5 pm Monday through Friday, but some evening and Saturday appointments are available for urgent visits.

And, we have access to resources in a range of medical specialties, including allergy, dermatology, endocrinology, ENT, orthopedics and pediatric dentistry.

For hospital services, we're affiliated with both Newton-Wellesley and Children's Hospitals.

For more information about pediatrics and DMA services generally, see our web site at www.dedhammedical.com.

NON-OFFICE HOURS

Although patients are normally seen during office hours, consultation from a pediatric caregiver for emergency problems is available during non-office hours. He or she can be contacted through DMA's main number (781-329-1400).
